DETAILED ACTION

Response to Amendment

1. The response filed April 24, 2008 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

3. Claims 33-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klein et al. (6,725,940).

Klein discloses an apparatus comprising:

an ejection unit having:

a plurality of heads, each head having:

an inner passage (passage from mixing device 34 to nozzle);

a plurality of nozzles (column 4, lines 56);

a cap unit having:

a plurality of caps 34;

an ejector device 38 having:

a supply port (water inlet port);

a suction port (foam inlet port);

a fluid supply 20;

a fluid supply pipeline 24, 102;

a flow rate regulating valve (discharge valve, column 4, line 54);
a suction pipeline 26, 100;
a pressure detector 106;
a suction pipeline gate valve 36;
a controller 42.

The recitation, "a plurality of heads...each head having a plurality of nozzles" reads on Klein's nozzles by mere grouping of Klein's nozzles.

Klein differs from the claimed invention in the intended use of the controller, "for selectively controlling the flow rate regulating valve and the suction pipeline gate valve as a function of the pressure detected by the pressure detector." An intended use recitation merely requires the ability to perform. A digital controller has the ability to control a valve as evidenced by the controller 42 controlling valve 80.

It would have been obvious to a person having ordinary skill in the art at the time of the invention to have controlled the valve 36 and the valve (discharge valve, column 4, line 54) using the controller 42 in the device of Klein for automation.

The recitation "adapted to..." merely requires the ability to so perform.

Response to Arguments

4. Applicant's arguments with respect to claims 33-39 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
